DETAILED ACTION

1. Applicant's arguments, see the last paragraph of page 6 and the first paragraph of page 7, filed 03 August 2004, with respect to claim 21 have been fully considered and are persuasive. The prior art rejection of claim 21 has been withdrawn.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 21 and 33 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-16 of U.S. Patent No. 6,742,535. Although the conflicting claims are not identical, they are not patentably distinct from each other because they do not support separate patents. Claims 21 and 33 herein are readable on the method embodiments claimed in Knowles et al '535, and the claims of Knowles '535 are readable on the method embodiments claimed in claims 21 and 33 herein.

4. Claims 22-32 and 34 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 15 April 2004.

Art Unit: 3753

The examiner does not agree that claims 22-32 and 34 are readable on the elected species. Applicant states that an un-numbered lip adjacent to bearing 75 in Figure 1 "can seal the apparatus onto an orifice of a fluid system by reducing pressure in the system or form a seal with the cooling system when reduced pressure is applied, in situations where the orifice and lip have the similar size." This "wishful sealing" is clearly not disclosed. In Figure 1, sealing clearly is accomplished by compression of sleeve 60 which expands sleeve 60 outwardly into sealing engagement with an orifice in which sleeve 60 is located. Claims 22 and 28 are drawn to the non-elected species of Figures 5-6B in which sealing is accomplished by pressure differential (see page 10, lines 10-11 herein, which states, "The seal can be improved by applying reduced pressure to the upper reduced pressure port 25.").

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
